PROFESSIONAL SUMMARY

Full Stack Developer specializing in building responsive and scalable web applications using the MERN stack. Skilled in developing modern frontend interfaces with React.js, Tailwind CSS, and JavaScript, while also building secure backend APIs with Node.js, Express.js, and MongoDB. Experienced in REST API integration, authentication systems, AI-powered features, and creating clean, user-friendly applications with a focus on performance optimization and scalable architecture.

PROFESSIONAL EXPERIENCE

Luminar Technolabs, ME(A)RN STACK Trainee

07/2025 – 02/2026

- Developed responsive web applications using React.js and MERN stack technologies
- Built CRUD-based MERN applications including Resume Builder, Notes App, and Freelancer CRM
- Created reusable UI components and responsive interfaces for better scalability and user experience
- Integrated REST APIs for frontend and backend communication
- Followed clean code practices and used Git/GitHub for version control and project management
- Improved problem-solving and development skills through hands-on project implementation

TECHNICAL SKILLS

Frontend

- React.js
- JavaScript
- HTML
- CSS

Styling

- Tailwind CSS
- Bootstrap

Tools

- Git/GitHub
- Figma
- Photoshop
- Postman

Concepts

- Responsive Design
- API Integration

EDUCATION

Bachelor of Computer Applications, Chinmaya College of Arts, Commerce & Science

09/2022 – 05/2025

PROJECTS

Freelancer CRM [🔗](https://freelancer-crm-frontend.vercel.app/), <https://freelancer-crm-frontend.vercel.app/>

- Built a responsive role-based CRM platform for Admin, Freelancer, and Client users using MERN stack
- Developed reusable React components and dynamic dashboards for improved scalability and user experience
- Integrated authentication workflows including secure login, email verification, and protected routes
- Implemented project management, freelancer management, and payment tracking interfaces
- Added real-time chat functionality and interactive frontend features for seamless communication
- Designed modern responsive UI layouts using clean frontend architecture principles

AI Interview Coach [🔗](https://ai-interviewer-kohl-sigma.vercel.app/), <https://ai-interviewer-kohl-sigma.vercel.app/>

- Built a full-stack AI-powered mock interview platform using the MERN stack with JWT authentication and protected routes
- Integrated Gemini AI API to generate personalized interview questions and AI-based performance evaluations
- Developed resume-based interview generation supporting PDF, DOCX, and TXT uploads with automatic role and skill detection
- Implemented interview analytics, progress tracking, history management, and structured AI feedback systems
- Built scalable REST APIs with Node.js, Express.js, and MongoDB including robust error handling and AI response validation

Interview Slot Manager [🔗](https://interviewly-gamma.vercel.app/), <https://interviewly-gamma.vercel.app/>

- Developed a responsive interview scheduling platform using React.js and MERN stack technologies
- Built dynamic interfaces for HR and Candidate users with role-based access flow
- Implemented real-time interview slot booking and availability management feature
- Created interactive forms and scheduling modules for interview management operation
- Integrated frontend with backend APIs for secure booking and data handling
- Improved usability through responsive layouts and intuitive user interface design

Temple Management System [🔗](https://temple-muringothappan.vercel.app/), <https://temple-muringothappan.vercel.app/>

- Developed a full-stack temple management platform using the MERN stack
- Built secure authentication and role-based authorization using JWT
- Implemented REST APIs and MongoDB to support scalable and efficient data management
- Built a responsive, modern user interface using React.js and Tailwind CSS
